cheque	8207	2025-06-04	Sigma Technologies	297.15	Two Hundred Ninty Seven and 15/100	National Bank	cheque_8207.pdf	297.15	true	Fully Applied

Key Metrics

Total Records 10	Matched Records 9	Mismatch Records 1
Match Rate Pct 90	Biggest Amount Variance "711.64"	

Executive Summary

The reconciliation analysis indicates a strong performance with a total of 10 records, of which 9 matched successfully, resulting in a match rate of 90%. The single mismatch was due to a missing proof for invoice ID 1010, highlighting a potential area for improvement in documentation processes.

The highest amount variance observed was \$711.64, associated with the cheque linked to invoice ID 1002. This variance underscores the importance of maintaining accurate records to ensure financial integrity and operational efficiency.

Actionable Insights

- Investigate the cause of the missing proof for invoice ID 1010 to prevent future discrepancies.
- Review the documentation processes to ensure all invoices have corresponding proof of payment.
- Monitor the variance in amounts to address any potential errors in recording or processing payments.
